

# Task Management System

---

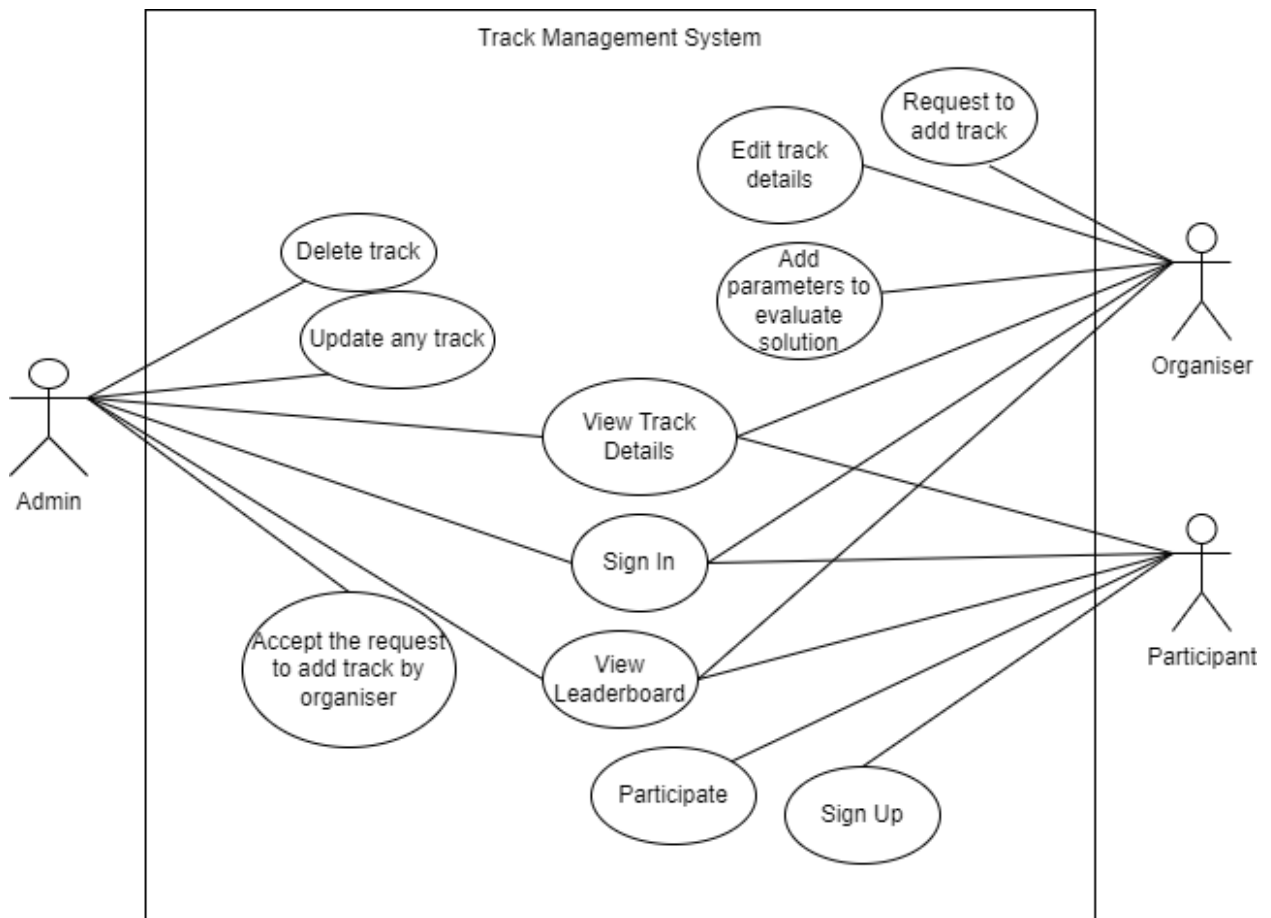

➤ **Functional requirements:**

- Login for different level for user (Admin, Organiser, Participant)
- Display Ongoing Tracks
- Participating in various tracks
- Request to post a track
- Creating Leaderboard
- Displaying Tracks Year Wise
- Submit Solution
- Evaluate Solution
- View Submitted Solution

➤ **Non-Functional requirements:**

- Maximum uptime (performance)
- Data security
- Reliability
- Intuitive User experience & Design (UI / UX)
- Database
- Maximum scalability

➤ Use Case Diagram

The "Agile model" is the one we like to employ while developing software. The system requirements are expected to vary often. Weekly communications with clients (TA) are what we anticipate.

Changes are welcome at any moment. Version updates will be released.  
cuts down on overall development time
